

WEBSITE NAME

Sorts alphabetically based on the Sort By option selected, e.g. if sorted by Authors then would sort alphabetically by authors. Each alternate click can reverse the order of the stories (e.g. A-Z vs Z-A). Perhaps the button can reflect this. So when click A-Z the button becomes Z-A, and vice versa.

Search Bar for different Stories. Later add searches for Authors.

Drop Down of different ways to Sort stories: Author, Story Title, and maybe Genre

Description

Directs to Login Page when not signed in. Becomes a Profile Button that Directs to User's Profile when signed in.

Search Stories (Search Bar)

Sort By
(Drop down of sorting options)

A-Z

Sign In

This will direct to the story page when clicked

Story Title

Cowabunga Cereal

Author

James237

Description

A woman makes a fascinating discovery in a cereal box

Rating

4/5

This can direct to a public viewing profile page of the author. Maybe we can use some of the overlay options you mentioned Andrew

(up to 20 stories per page)

No need for rating yet, may insert genres for the time being. If not can shift Description closer to the right.

1, 2, 3 ...
(list Page number)

The Page number the user is on will be bolded. Clicking each page number goes to that page of stories as ordered by the sorting button

Previous

Next

Directs to previous page of stories as ordered by Sort By Button

Directs to next page of stories as ordered by Sort By Button
